Our team consists of multi-cultural medical professionals with diverse experience. We are international with partners covering all MENA Region, South Korea, Canada, India, USA, and Europe.

VICTOR MEDICAL & SURGICAL INSTRUMENTS

- Victor Medical supplies different types of surgical instruments of high quality. Our minimally invasive instruments and surgical stapling devices are manufactured by advanced technology. We keep doing studies on the development of disposable surgical instruments and industry trends.

CLASSIFICATION OF SURGICAL INSTRUMENTS LAPAROSCOPIC SURGICAL INSTRUMENTS

- After 20 years of development, the application of laparoscopy in surgery has gradually evolved from the initial simple cholecystectomy to today's general surgery involving gastrointestinal, hepatobiliary, pancreatic, thyroid, breast, and abdominal wall surgery.
- As one of the most reliable laparoscopic instruments manufacturers, Victor Medical has a rich product line of endoscopic surgical instruments, including basic laparoscopic instruments, single use laparoscopic instruments, and so on, which can meet most of the needs of doctors in the clinic.

OPEN SURGICAL INSTRUMENTS

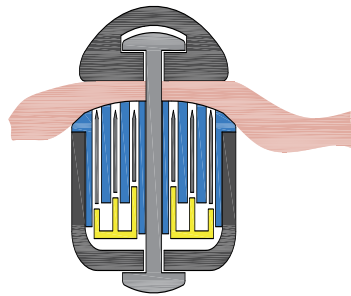

- Our company produces a full range of open surgical instruments such as trocar surgical instrument to meet the surgical needs of doctors under the current status of medical device development, and continues to innovate and improve open surgical medical devices and update product lines.

VICTOR MEDICAL & SURGICAL INSTRUMENTS

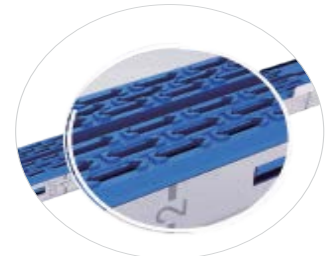

The staple height reaches up to 5.0mm for green reload

The staple height reaches up to 5.0mm for green reload. Ensure suturing extra-thick tissue, To effectively prevent the staples, opening by extra-thick tissue.

Different staple heights from inner to outer rows

Adapt to different tissue thickness. Excellent hemostatic effect. To provide optimal blood supply.

Grasping surface design

Providing the least tissue slippage during firing.

Reinforced and one-piece I-beam design

Effectively control of the space between reload and anvil, consistently force control of the parallel clamping, reducing tissue damage in second closure, ensure optimal B-shape formation.

Extra-thin reinforced and one-piece anvil

Stable performance during firing. Optimal staple formation. To be easier passing the narrow tissue gap with the extra-thin anvil.

oriented design **normal design**

Drop-shaped oriented anvil design

Ensure consistent B-shape formation, excellent hemostasis.

VICTOR MEDICAL & SURGICAL INSTRUMENTS
